第三部分 阅读理解 (共 15 小题, 满分 25 分)

A

What picture do you have of the future? Will life in the future be better, worse or the same as now? What do you hope for about the future? Scientists think that life will probably be very different in 2050.

First of all, it seems that people won't use TV channels(频道) by 2050. Instead, people will choose a program from a "menu" and a computer will send the program directly to the television.

Water will become a very serious problem. We'll need much more water, but there won't be enough. Some scientists think that water would be the cause of war(战争).

Cars will run on new, clean energy and they will go very fast. And there won't be any accidents with the help of computers. On the other hand, space planes will take people around the world in two hours.

Robots will work in factories instead of people. Many factories have already used robots. Big companies prefer robots--they do not ask for money, and they work for 24 hours a day...

In a word, by 2050, our life will change a lot and our future will be quite different from now.

People are always afraid of making mistakes. But sometimes it's not bad to make mistakes, and here is why.

At first, mistakes are a clear sign that you are trying new things. It's always good to try new things, because when you are trying new things you are growing. If you never try new things, how can you improve? How can you create? The simple answer is,. "You can't." Look around you, everything you see is the result of someone trying new things.

Another good thing about mistakes is this: when you are making mistakes, you are learning. Consider this: Edison failed 10,000 times before he invented the light bulb. When he was asked how he felt to fail that many times, he said that he hadn't failed 10,000 times, but rather had learned 10,000 things that didn't work.

Finally, when you make a mistake, you are that much closer to success. Why? Because you have said what you should say, and you have done what you should do. Every time you make a mistake, you are closer to success. But it doesn't mean that you can make mistakes without thinking. Instead, when you try new things you have to think them over, so that you can keep away from some unnecessary mistakes.

We shouldn't spend all our time and money on the only one way, but use them correctly. Because our time and money are limited(有限的).
